# TREE ID SCAVENGER HUNT

The adventure starts here! Learn about trees while experiencing the museum.

1. The map will guide you to marked trees around the campus.
2. The icon on the map will tell you where to look for each tree. When you arrive at the spot, look for the tree marked with a ribbon.
3. Use the pictures and information on the back of this sheet to help you identify each marked tree.
4. Each icon has a number in it. When you have identified the tree, write the number from the icon on the map in the icon of the correct tree information box on the back of this sheet.

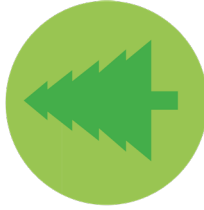

## WHITE BIRCH

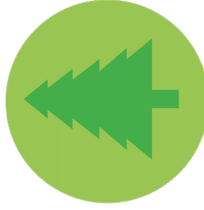

**Take a closer look:**  
There are teeth on the leaf edge, like a saw.

## RED SPRUCE

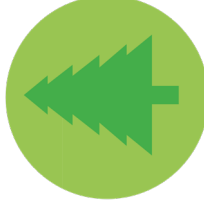

**Take a closer look:**  
The needles are sharp when you squeeze them.

## MOUNTAIN ASH

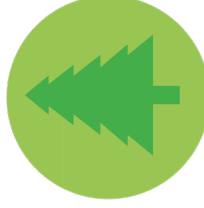

**Take a closer look:**  
The leaf has many leaflets attached to a middle vein, like a feather.

## WHITE PINE

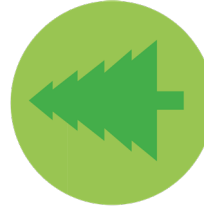

**Take a closer look:**  
Needles are in bunches of 5.

## SUGAR MAPLE

**Take a closer look:**  
Leaves are lobed.

## BALSAM FIR

**Take a closer look:**  
The needles smell nice when you rub them
