FEATURED EXHIBITS

ARTISTS & INSPIRATION IN THE WILD! (OPENING JULY 1)

This upcoming exhibition will feature the most comprehensive showing of our art collection in the museum's history. The four main galleries will illustrate how the natural features of the Adirondacks—light, forests, water, and mountains—have sparked the creative visions of painters, sculptors, and artisans.

SCARRED LANDSCAPE: THE ADIRONDACK PHOTOGRAPHS OF J. HENRY FAIR

This temporary exhibition features the monumental aerial photographs of photographer J. Henry Fair as he documents the impact of human activity in the Adirondack Park. Scarring of the landscape from mining, paper mills, agriculture, climate change, etc. are not always apparent from the ground. Resembling colorful abstract paintings, these images sometimes require a closer look to fully realize that beauty hides a less attractive story.

ADKX BOATHOUSE

Follow our easy 3/4-mile hiking trail to the newly constructed Adirondack-style boathouse — home to a fleet of vintage wooden craft including classic guideboats and canoes. Or, simply enjoy a picnic lunch at the boathouse along the shores of Minnow Pond.

LIFE IN THE ADIRONDACKS

Experience the people, place, and spirit of this six-million-acre park, all within 19,000-square feet of interactive exhibits, hands-on activities, and culturally rich collections. This core exhibition is every visitor's starting point.
